

Project Initialization and Planning Phase

Date	3 July 2026
Team ID	XXXXXX
Project Name	Rising Waters - Flood Prediction System
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A disaster management officer.	Predict flood risk in a region before heavy rainfall occurs.	Existing forecasting methods may not provide timely and accurate predictions.	Floods depend on multiple weather factors and traditional methods have limitations.	Concerned about public safety and the need for reliable early warnings.
PS-2	A Meteorologist	Analyze weather conditions to identify possible flood events.	Large amounts of weather data are difficult to	Multiple parameters such as rainfall, humidity, and cloud cover	Hopeful that an AI-based system can support faster and more

			analyze manually.	influence flood occurrence.	accurate decisions.
PS-3	A district administration officer.	Plan evacuation and resource allocation before flooding occurs.	It is difficult to determine which areas are at higher risk.	Delayed or inaccurate predictions can affect emergency response.	More confident when using a reliable flood prediction system.
