

Project Demo Planning

Date	3 July 2026
Team ID	XXXXXX
Project Name	Rising Waters – Flood Prediction System
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Introduce the project, explain the flood prediction problem and project objectives	2	Al Rihab Chandhini Mohammed
2	Dataset & Model Development	Explain the dataset, preprocessing, and machine learning models used	3	Ranadeep Vinukonda
3	Model Comparison & Best Model	Present model performance comparison and explain why Decision Tree was selected	2	Satyanarayana Akula
4	Web Application Demonstration	Demonstrate the Flask application, user interface, and prediction workflow	3	Vijay Kiran Kommoju
5	Project Documentation & GitHub	Show the GitHub repository, project structure, and documentation	2	Al Rihab Chandhini Mohammed
6	Conclusion & Future Enhancements	Summarize the project, discuss future improvements, and thank the audience	2	Prem Satya Sai Udatha

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the flood prediction problem, objectives, and motivation behind the project.
2	Solution Overview	Describe the dataset, preprocessing, machine learning models, Flask architecture, and technology stack.

3	Live Feature Demonstration	Run the web application, enter sample weather values, and demonstrate flood/no-flood prediction.
4	Q&A Session	Answer questions about the dataset, model selection, implementation, and future enhancements.
