

Brainstorming & Idea Prioritization Template

Date	03 July 2026
Team ID	XXXXXX
Project Name	Rising Waters-Flood Prediction System
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Al Rihab Chandhini Mohammed	Develop an AI-based Flood Prediction System using weather and rainfall data.	Machine Learning	1
2	Satyanarayana Akula	Compare multiple ML algorithms (Decision Tree, Random Forest, KNN, XGBoost) to identify the best model.	Model Development	1
3	Prem Satya Sai Udatha	Perform data preprocessing and exploratory data analysis to improve prediction accuracy.	Data Analysis	2
4	Vijay Kiran Kommoju	Develop a Flask-based web application with an easy-to-use interface for flood prediction.	Web Application	3

5	Ranadeep Vinukonda	Apply feature scaling, split the dataset into training and testing sets, and build Decision Tree and Random Forest models.	Data Preprocessing & Model Building	2
6	Team Discussion	Early flood warning system	Machine Learning	1

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	AI-Based Flood Prediction System	High	High	1	Yes
2	Data Analysis and Preprocessing	High	High	2	Yes
3	Flask Web Application and Cloud Deployment	Medium	High	3	Yes
