

Demonstration of Proposed Features

Date	3 July 2026
Team ID	XXXXXX
Project Name	Rising Waters – Flood Prediction System
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Flood Prediction	Predicts flood occurrence using weather parameters	Implemented	Yes	Working successfully
2	Multiple ML Models	Trains Decision Tree, Random Forest, KNN, and XGBoost models	Implemented	Yes	Models compared based on accuracy
3	Best Model Selection	Selects and saves the highest-performing model (.pkl)	Implemented	Yes	Decision Tree selected as best model
4	Flask Web Application	Integrates the trained model with a Flask backend	Implemented	Yes	Accepts user input and predicts flood risk
5	User-Friendly Frontend	HTML, CSS, and JavaScript interface for entering weather data	Implemented	Yes	Responsive and easy to use
6	Prediction Result Display	Displays Flood/No Flood prediction based on input values	Implemented	Yes	Prediction shown instantly

Feature Implementation Summary:

Total Features Proposed	6
--------------------------------	---

Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
